

ATLS

ATLS can be shipped directly with the automated warehouse forwarding desk

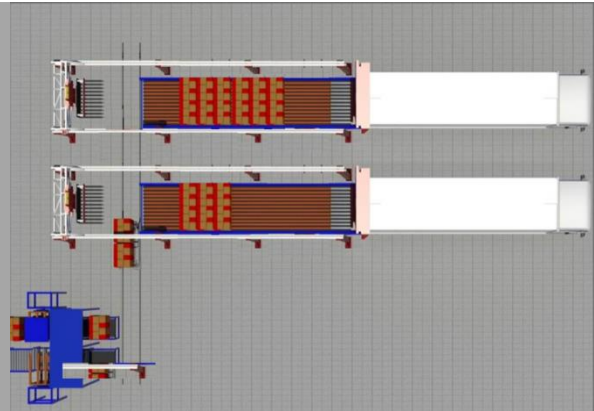

ATLS(Auto Truck Loading System)

ATLS(Auto Truck Loading System) is an automated pallet loading system. ATLS is able to load products into a container or a truck without additional installation of devices.

Using SMC's ATLS will dramatically decrease working time. Depending on product and load size, operation time will differ; however, it will be less than 20 minutes in average. The most significant benefit of ATLS is that no human intervention is required to load the pallet on container. Customer can achieve high efficiency with accurate work flow and steady operational speed.

Basic Specification

- ✓ Speed : X/Y axis 60m/min , Z axis 10m/min
- ✓ Loading operation : Gantry
- ✓ Single/dual loading dock

Benefit

- ✓ Load products without pallet
- ✓ Automatic loading and unloading
- ✓ Direct link from ASRS storage
- ✓ Various types of application according to customer's requirement
- ✓ Wrapping m/c is installable as option
