

# Upper Level Palletizer

---

**Upper Level Palletizer is easily linked with production line or shipping line**

## Upper Level Palletizer

Upper Level Palletizers are designed and built to automatically stack bags, bales and boxes in squares effectively on pallets.

SMC's upper level palletizer is applicable to all kinds of bags, bale, or boxes in squares. It helps the factory's full automation without direct human support. It is suitable especially for companies that handle powdered products in square bags.

## Basic Specification

- ✓ Length: 7.5-18M
- ✓ Width: 6-8M
- ✓ Height: 3-4.5M
- ✓ Load Range: 25-60KG/bag (depending of operation speed)
- ✓ Load weight : Max. 1800KG(excluding pallet)
- ✓ Controller : PLC or SMC board

## Benefit

- ✓ High speed conveyor
- ✓ Up to 60kg handling (more heavy load can be customized)
- ✓ Reduce damage from mishandling during the loading process
- ✓ Up to 10 layers of stack (vary depending on load weight and type)
- ✓ Easily linked with production line or shipping line
- ✓ Can be installed with wrapping m/c
